Presentation Title

Optional subtitle

Author One KC4AAA[1,2], Author Two KC4USV[1]

[1]HamSCI
[2]Institution Two

Meeting name, City, Day Month Year

Introduction

Open every slide with one line that says what the audience should remember

- Then support it with short lines, a table, or a figure, not paragraphs.
- Keep fonts large enough to read from the back of the room.
- Use American English throughout: color, center, modeled, labeled.

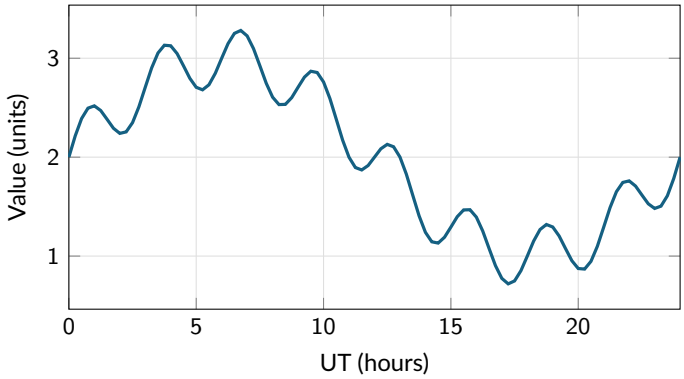

Methodology

Tables carry numbers better than sentences do

Instrument	Network	What it measures
HF receivers	PSKReporter, RBN, WSPRNet	who heard whom, signal-to-noise ratio
PSWS Grape	HamSCI PSWS	Doppler shift of time-standard stations
Ionosonde	GIRO	electron density profile

Details and caveats go in a footnote-sized line below the table.

Results

Put the figure first, and the text in the whitespace beside it

Size the figure to fill the slide, then fit the words around it.

Figure: link to the PNG • code: link to the script, pinned to a commit

Discussion

Two columns let you compare without crowding

What the data show

- First point
- Second point

What remains open

- First question
- Second question

Summary

Three to five numbered points, each one line

1. **Observed**: the main result, with its number.
2. **Interpretation**: what it means.
3. **Next**: what comes next.

Acknowledgments

The HamSCI Community is led by The University of Scranton Department of Physics and Engineering W3USR, in collaboration with Case Western Reserve University W8EDU, the University of Alabama, the New Jersey Institute of Technology Center for Solar Terrestrial Physics K2MFF, Space Science Institute, Dartmouth College, the MIT Haystack Observatory, TAPR, additional collaborating universities and institutions, and volunteer members of the amateur radio and citizen science communities.

We are grateful for the financial support of the United States National Science Foundation, NASA, and Amateur Radio Digital Communications (ARDC). This work is supported by *list the awards that funded this work*.

HamSCI silhouette photo by Ann Marie Rogalcheck-Frissell KC2KRQ.

Disclosure of AI use

- **Tool**: name and exact model version, for example Claude (Anthropic), `claude-opus-5-5`, via Claude Code.
- **When**: the dates of the AI-assisted sessions.
- **How it was used**: concretely, for example analysis code, figures, or drafting of these slides.
- **Human oversight**: the authors decided the research questions, methods and interpretation, reviewed all AI-assisted output, and are responsible for all content.
- **Record**: where the session log is kept, for example `ai/ai_usage_log.md` in the project repository.

Thank you!
